Robotics Web App User Evaluation
Han Meng Loo

The aim of this experiment is to investigate the potential of this web app being an alternative platform for the robotics foundation students to work on their weekly lab exercises. I was also looking to see whether you made use of the guide on the home page, and whether you appeared confused at any time about how to perform the task. I wanted to know how easy the pages are to navigate and how easy it was to work on the lab exercises (code/ run simulations) on this web app.

Do you have any comments or questions about the experiment? Please take a note of my email address, 2288527l@student.gla.ac.uk and the email address of the module co-ordinator, gerardo.aragoncamarasa@glasgow.ac.uk and please let us know if you gave any further questions about this experiment. Thank you for your help.

Possible issues:
